Physical Therapy Applications for Assessing and Counseling Older Drivers

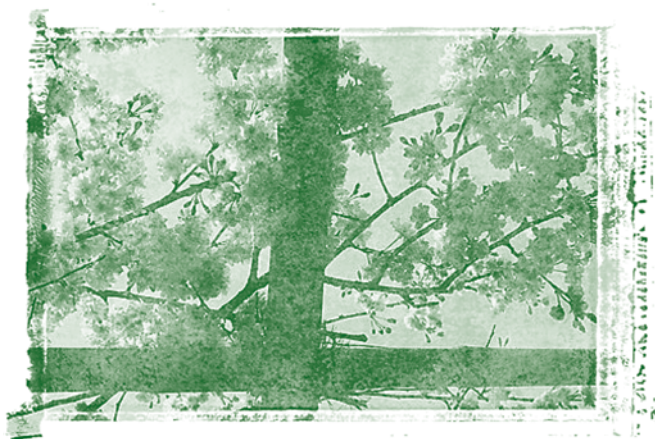

Cheryl LaFollette Anderson,
PT, PhD, MBA, GCS
Alexandria, Minnesota

Mary Thompson, PT, PhD, GCS—Editor
Sue Wenker, PT, MS, GCS—Editor

Topics in Geriatrics: Volume 3

Editor's Note

Dear Home Study Course Participants,

We are pleased to present this monograph by Cheryl Anderson, PT, PhD, MBA, GCS. For the past 20 years she has been interested in older adults and their functional limitations, especially as the limitations affect driving. In her daily work, Dr Anderson intertwines this area of interest with health policy and ways to change current paradigms. We think you will enjoy this monograph, as it leads us to better understand the impact physical therapists can have on a person's ability to drive. Dr Anderson clearly shows how physical therapists can be a part of the health care team providing services to the older driver.

Mary Thompson, PT, PhD, GCS

TABLE OF CONTENTS

LEARNING OBJECTIVES	1
INTRODUCTION.....	1
OVERVIEW: SAFETY AND THE OLDER DRIVER	2
CASE STUDY 1: IS THERE A PROBLEM?.....	3
Case Analysis	3
Risk Analysis.....	4
RED FLAGS FOR MEDICALLY IMPAIRED DRIVING	4
Observation	4
Medical Red Flags.....	5
CASE STUDY 1 CONTINUED	7
Case Analysis	7
FORMAL ASSESSMENT	7
Vision	7
Visual acuity	8
Visual fields by confrontation testing.....	9
Concluding thoughts on vision assessment and driving	9
Cognition	9
Trail-making Test.....	9
Clock-drawing Test.....	10
Motor Function.....	10
Rapid-pace walk	10
Range of motion.....	10
Manual muscle testing	11
Assessment of Driving-related Skills Reviewed	11
MEDICAL CONDITIONS THAT IMPACT DRIVING ABILITY	11
Vision	11
Night vision.....	12
Glare	12
Contrast sensitivity	12

Cardiovascular Disease.....	12
Cerebrovascular Disease.....	13
Neurologic Disease	13
Parkinson disease	13
Multiple sclerosis	13
Narcolepsy and other sleep disorders.....	14
Vestibular disease	14
Dementia.....	14
Musculoskeletal Conditions.....	15
Arthritis.....	15
Lower-extremity conditions	15
Limited flexibility	15
Orthopaedic procedures.....	15
Peripheral Vascular Disease	16
Renal Disease.....	16
Respiratory Disease.....	16
Medications	16
THE PHYSICAL THERAPIST’S ROLE	17
Driver Rehabilitation Specialist.....	17
Transportation Plan	18
CONCLUSION	18
CASE STUDY 2	19
Case Analysis	19
REFERENCES	20
REVIEW QUESTIONS.....	23
